

Women's Health in Your 60s

During this decade, nurture your health to mentor and motivate the next generation.

Check out the healthy guidelines below. Then work with your provider to personalize the timing of each test to meet your specific health care needs.

General Health

- Annual preventative care visit (65+ annual wellness visit and Part B Medicare) — including weight, height, blood pressure, screenings and creation of individual preventative care plan
- Chronic health conditions — review current diagnoses and medications at least yearly
- Sleep habits — discuss at your annual exam
- Thyroid (TSH) test — discuss with your provider
- HIV screening — once before age 65; get additional testing if you are at risk for HIV infection (have had unprotected sex, sexually transmitted disease or used drugs with needles)
- Hepatitis C (HCV) screening — get this one time between ages 18 and 79

Lung Health

- Low-dose CT — through age 80 based on current or past smoking history

Heart Health

- Blood pressure test — at least yearly
- Cholesterol panel — total, LDL, HDL and triglycerides; discuss with your provider

Bone Health

- Bone density screening — get a bone mineral test at least once at age 65; talk to your provider about repeat testing

Prediabetes & Diabetes

- Blood glucose or A1c test — every one to three years if overweight or obese or risk factors are present

Breast Health

- Breast self-exam — become familiar with your breasts to identify any changes and discuss with your provider
- Mammogram — every one to two years; official recommendations vary; discuss the schedule that is right for you with your provider

Mental Health Screening

- Depression screening — yearly

Reproductive Health

- Pap test — every one to five years through age 65, then limited situations only; discuss with your provider
- Pelvic exam — discuss with your provider
- Sexually transmitted infection (STI) tests — both partners should get tested for STIs, including HIV, before initiating sexual intercourse; get a chlamydia test yearly if you have new or multiple partners

Colorectal Health

- Fecal immunoassay test, FIT-DNA test, flexible sigmoidoscopy, colonoscopy — talk to your provider about the best screening test for you and how often you need it

Eye & Ear Health

- Comprehensive eye exam — every one to two years
- Hearing test — every three years

Skin Health

- Skin exam — monthly self-exam of skin and moles, and as part of a routine full checkup with your provider

Oral Health

- Dental cleaning and exam — every 12 to 24 months; discuss with your dentist

Immunizations

- COVID-19 vaccine — discuss with your provider
- Influenza vaccine — yearly
- Tetanus-diphtheria-pertussis booster vaccine — every 10 years
- Pneumococcal vaccine — one or two doses; discuss with your provider
- Herpes zoster vaccine (to prevent shingles) — two doses; discuss with your provider
- Hepatitis A, hepatitis B and meningococcal vaccines — discuss with your provider
